PROFESSIONAL SUMMARY

Product Designer with 4 years of experience across SaaS products, mobile apps, web platforms, and enterprise tools. I've shipped 50+ projects for global clients in healthcare, logistics, manufacturing, and food science. Recently designed a commercial SaaS product on my own, both marketing site and full application UI. My work covers the full process, from stakeholder research and IA to high-fidelity prototypes and developer handoff. Looking for a product design role where I can own user problems end to end and ship work that reaches a broader user base.

SKILLS

Design: Figma, Adobe XD, Adobe Illustrator, Photoshop, Framer, Webflow

UX: User Research, Information Architecture, Wireframing, Prototyping, Usability Testing, Competitive Analysis, Personas, User Flows, Journey Mapping

UI: Visual Design, Interaction Design, Responsive Design, Design Systems, Component Libraries, Accessibility, Micro-interactions

AI Tools: Claude, ChatGPT, Figma Make, Prompt Engineering

Collaboration: Stakeholder Management, Design Critique, Agile, Notion, Miro, FigJam, Jira

WORK EXPERIENCE

Product Designer

Design Agency, Chennai

November 2022 – Present

- Shipped 50+ digital products for global clients, including SaaS platforms, mobile apps, marketing websites, and enterprise web applications.
- Designed and launched a commercial document management SaaS product solo, owning both the marketing site in Webflow and the full application UI in Figma, used by enterprise clients today.
- Ran stakeholder research, built information architecture, and designed high-fidelity Figma prototypes for products used by thousands of employees daily across multiple industries.
- Conducted user research, competitive analysis, and usability testing to replace assumptions with evidence before committing to a design direction.
- Built reusable Figma component libraries and design systems that cut repeat work across projects and kept visual language consistent.
- Use Claude and ChatGPT daily for research synthesis, UX copywriting, draft personas, and sharpening design decisions before stakeholder reviews.
- Partnered with developers, product managers, and stakeholders through the full build, not just the handoff file.

KEY PROJECTS

Enterprise Document Management SaaS Product
Live commercial SaaS product I designed solo over 2 months, from marketing site to application UI to the design system behind both. Designed for four user types with different mental models, unified in one coherent product experience.

Health-Focused Food Delivery Mobile App
Mobile app built around ingredient transparency and allergen safety. Ran a 30-respondent survey and 6 in-person usability tests, then shipped 4 design iterations based on what people actually struggled with.

Fuel Price Comparison and Roadside Assistance App
Mobile app for a decision drivers make weekly but think about for ten seconds. Six screens, two personas, a dark-mode design system, and complete user flows for both daily commuters and outstation travellers.

EDUCATION

Bachelor's Degree in Fire and Industrial Safety
ASSET Institute of Technology, Chennai
2017 – 2021
